

Hwy 250 in Lanesboro

Project description

MnDOT is planning improvements to Hwy 250 from the Hwy 250 bridge over the Root River to Hwy 16, including reconstructing the road and replacing utilities. Construction for this project is anticipated to begin in 2026.

Project timeline

- **Community engagement (spring 2023):** Seek community input on the future of the road
- **Design and engineering (2024-2025):** Design the road
- **Construction (2026):** Construction is anticipated to begin

Feedback opportunities

MnDOT is collaborating with the City of Lanesboro to seek community feedback on the design of the road.

Scan this code or visit the project webpage at <https://talk.dot.state.mn.us/hwy250-lanesboro> to read about the project and provide feedback via a survey and interactive map.

- **Online survey:** After reviewing online resources, make sure to take the survey! The survey is open until April 30.
- **Interactive comment map:** Is there a specific intersection where you have trouble making right turns? Or maybe you'd like to see a crosswalk added somewhere? You can also provide comments on specific places along Hwy 250 in Lanesboro through the online map.
